Turtles all the way down through Panoply

Turtles all the way down refers to a catchphrase used by the character of the same name from the Discworld novel "Small Gods." The phrase was coined by Terry Pratchett, the author of the Discworld series, as a way to express the idea that everything in the Discworld has a turtle as its base, and that these turtles are themselves being carried by a giant turtle. This idea is used to illustrate the interconnectedness of all things in the universe, and is also a central theme in the novel. The phrase has since become a popular meme and is often used to express the idea that everything in the universe is interconnected and has a cause-and-effect relationship with everything else. It is a playful way to express the idea that all things are part of a larger whole and that everything is connected to everything else in some way.
