बागड़ो की अद्भुत सुंदरता

SINGER : RADHA CHOUDHARY

By Christina Shaffer | image courtesy of Microsoft. The Philips GoGear MP3 allows you to sync hundreds of your favorite songs from your PC and listen to them on-the-go. Many GoGear models are bundled with the Philips Songbird software for transferring music and videos to the device. After you import your music or rip an album to your Songbird music library, you can sync them directly to the GoGear by using the drag-and-drop method. Prior to syncing the files, however, make sure they are in a format that is supported by your player's model, such as MP3 or WAV. Connect the Philips GoGear to the computer by using the device's USB cable. Add music to your Songbird music library by clicking the "File" tab and selecting the "Import Media" option. Select the folder that contains the songs you want to sync to the device, such as My Music, and click "OK." Click "Music" in the Library pane to view all of the songs you imported. Select the songs you want to sync to the device. To select multiple tracks, hold the "Ctrl" button on the keyboard and click each song with the mouse. Click and drag the highlighted songs to the Philips GoGear icon in the Library pane to automatically sync the files to the device. Convert to MP3 format: In iTunes or Music, select songs and go to File > Convert > Create MP3 version or use a third-party file converter. Put MP3s on your player: Attach your MP3 player to your computer. Open iTunes or Music. Right-click a song and select Show in Windows Explorer (Windows) or Show in Finder (Mac). Copy the MP3 version and paste to MP3 player. This article explains how to convert music on a computer to MP3 format and move it to an MP3 player. These directions apply to iTunes 12.9 and newer on Windows 10 PCs, to iTunes on macOS Mojave (10.14) and earlier, and to the Music app in macOS Catalina (10.15) and later. If you have a collection of music in iTunes or the Music app on your computer, you don't need an iPod from Apple to listen to it on the go, nor do you need an MP3 player you can use with iTunes. You can put music from iTunes onto any MP3 player. If your MP3 player only accepts MP3 music files, you need to first convert the music to the MP3 format in the iTunes program or with a third-party converter. In iTunes or the Music app, the settings for converting iTunes songs to the MP3 format are straightforward. Select the songs you want to put on your MP3 player and go to File > Convert > Create MP3 Version. Music that is copy-protected with the DRM encryption system that Apple used in 2009 and earlier can't be converted with iTunes. Your other option is to use an audio file converter to save the music to MP3 format. There are online converters and offline converters. Use an online converter like Convertio to put a few iTunes songs on your MP3 player. Offline converters like Freemake Audio Converter are better for converting lots of files at once. If you choose a file converter tool, locate the song on your computer. To do that, right-click the song you want to put on your MP3 player, then choose Show in Windows Explorer (for Windows) or Show in Finder (on a Mac). Then, upload that file to the online audio file converter or import it into the offline converter. After the songs you want on your MP3 player are converted to the correct format for your device, move the files to the MP3 player. Not all MP3 players work the same way. Consult the documentation for your specific device if these steps don't work. Plug the MP3 player into your computer. Open iTunes or Music and locate the songs that you want to copy. One easy way to do this is to right-click the song and select Show in Windows Explorer (Windows) or Show in Finder (Mac). Copy the songs, making sure to select the MP3 version if there are multiple audio file formats. If the file extensions are hidden, you can change the settings to view them. If you have software associated with the MP3 player, use it to import the iTunes songs. Paste the iTunes music to your MP3 player. It is usually a folder you can access like a flash drive. Thanks for letting us know! Get the Latest Tech News Delivered Every Day Subscribe Tell us why! monticello/Shutterstock.com Do you want to download a song from SoundCloud to your device for offline listening? If so, there's an official way to save music tracks from this site, and we'll show you how to use it. Limitations of Downloading Songs on SoundCloud Not every song on SoundCloud is downloadable. You can only download the songs whose creators have made those songs downloadable. Also, you can't perform this download process on a mobile device. You must use a Windows, Mac, Linux, or Chromebook computer to save songs from SoundCloud. Additionally, downloading songs requires you to sign in to your SoundCloud account. Download Songs From SoundCloud to Your Computer To start the download process, first, open a web browser on your Windows, Mac, Linux, or Chromebook computer and launch the SoundCloud site. Then log in to your SoundCloud account. When you are logged in, at the top of the SoundCloud site, click the "Search" field. In the "Search" field, type the name of the song you want to download and press Enter. From the search results that appear, find the song to download. Then, beneath the song, click the More > Download File option. Note: If you don't see the "Download File" option, you can't download that specific song. This is because the creator doesn't allow that song to be downloaded. Your computer's standard save window will open. In our example images, we're using Mac. Here, click the "Save As" box and type a name for your song. Choose a folder to save your song in. Then, at the bottom of the window, click "Save." And your chosen SoundCloud song is saved to your computer. You can now convert this downloaded song to another format, transfer it to your Android phone, or add it to Apple Music for on-the-go listening. Besides SoundCloud, there are several other sites where you can legally download music for free. Check them out if you're interested. RELATED: 7 Best Places to Download Free Music (Legally) By Contributor Updated July 21, 2017 MP3 Rocket is one of several music/video downloading services that takes advantage of the Gnutella Network, which allows users to share their files with others via the Internet. Similar to Limewire, the program is very easy to use and gives you unlimited free access to millions of music and video files. Download and install the software from the MP3 Rocket website, but be careful. The basic version of the program is free, but you can pay up to \$34 for a "pro" version if you want more than the basic ability to download and share files. Choose the type of file you'd like to download by clicking on one of the icons in the left panel or select "All Types." Enter the file name of the file you want to find in the box in the left panel, and click on "search" or select one of the categories from the toolbar across the top, which will give you access to the more popular music files. Select the genre of music you want from the list in the left panel and names of artists and songs will appear in the right panel. Double click on the artist and song you want and the software will begin searching the network for all files containing that information. They are then displayed as a list in the right panel. Click on the version you want to download and the program will download it to your computer. Your download time may be affected by the connection of the computer hosting the file. If you have the following connections it may take a while to download: Dialup (56k) 8 m 38 s, ISDN (128k) 3 m 46 s, DSL (512k) 56 s, Cable (1024k) 28 s, T1 (1484k) 19 s. Do not click on "Continue" on the MP3 Rocket home page if you want the free version of the software. Clicking on "Continue" brings you to a page to sign up for the Pro version, which can cost you up to \$35. To get the free version, click on the word "download" at the bottom of the page. Beware of copyrighted or licensed files that may be available on the network. Since it's a file-sharing service, there may be many of these listed. Downloading them without paying for them is illegal. Check the MP3 Rocket website for tips on how to recognize these files. Updated: 08/31/2020 by Computer Hope The process of downloading a song or small sound clips over the Internet depends on the website or application you use to download the song. Each website, like Amazon.com, or application, like iTunes, uses its own utility and process for downloading a song. To proceed, select the service from which you would like to download music, and then follow the instructions. Some sites offer an MP3 download link similar to the example below. You can save the MP3 by right-clicking the link and choosing the option to Save link as, Save target as, or the Save linked content as a link. Once the file is saved, it appears in your downloads folder. Example of an MP3 download. Note Most browsers opens the MP3 if you click the link. Although you're downloading the MP3 to listen to the file, it isn't stored in an easy to access location. If you right-click the file and save the link, you can choose where you want to save the MP3 file and open it with any media program capable of playing MP3 files. Tip In Google Chrome and Opera, you can click the link and in the player click the down arrow to download the file from the player. How to download from Amazon.com The Amazon.com website offers two options for downloading a song: Download to computer - download a song to the user's computer through the use of a download utility, which is installed on the computer. Upload to Amazon Cloud account - uploads a song to the user's Amazon Cloud account, where the song can be accessed from any computer. With either option, you need to purchase the song first, then download to their computer or upload to their cloud account. Instructions for each option are provided on the Amazon.com website after the purchase is completed. How to download an iTunes song Through the iTunes Store, a user can download a song to their computer or upload a song to their Apple iCloud account. If a song is downloaded to their computer, it can be added to an iPhone, iPad, or iPod. If a song is uploaded to an iCloud account, it can be accessed from any Apple device connecting to that iCloud account. Once the song purchase is completed, instructions for downloading or uploading are provided in the iTunes Store. How to download Google Play Music Any user who has a Google account (anyone with a Gmail address) can download music or save their collection to a service called Google Play Music. Once a song is uploaded or purchased, it can be accessed on any device that is capable of running Google's services. These devices include desktop computers, laptop computers, Chromebooks, tablets, and smartphones. Once you've signed in to Google Play Music, there are instructions on how to add songs you own, and how to purchase and download new music. How to download a SoundCloud song For users who are looking for new, original works from today's aspiring artists, SoundCloud offers a free solution. Sign up for an account, and you'll be able to stream and download from people all around the world. How to download audio and music from other services There are other websites where songs can be downloaded or listened to through streaming audio. Some of these websites may offer applications that can be downloaded to your computer that allow the user to perform these functions. Instructions on how to listen to and download music on these services should be provided either on the website or application. Follow the on-screen instructions that are provided. Caution Some websites and downloadable songs may include viruses or malware in the music files. It is best to download music from reputable, well-known sources to minimize the chance of your computer becoming infected.
